# Sample Document

Sample Document

This is a sample PDF document for testing the PdfLoader.

Section 1: Introduction
This document contains various sections to test the PDF loader functionality.
It includes multiple paragraphs to test text extraction.

Section 2: Technical Details
The PDF loader should be able to extract this text and convert it to markdown format.
This is important for the ingestion pipeline.

Section 3: Testing
Various test cases will verify that:
1. Text extraction works correctly
2. Metadata is properly extracted
3. Document structure is preserved
